2020 - 2022

EXPERIENCE

ROMSAN IT & SERVICES

Quality Assurance Engineer Intern

Bhilai, Chhattisgarh

2023

Collaborated with cross-functional teams to ensure high-quality web applications through manual and automated testing, defect tracking, and agile participation.

Validated production readiness by replicating issues, confirming fixes, and performing regression tests to ensure application stability and performance.

Contributed usability insights, improved QA processes, and supported system stability through continuous monitoring and proactive quality enhancements.

Participated in daily standups and sprint planning meetings, supporting the development team with detailed test reports and documentation.

Manage and coordinate placement day activities, ensuring smooth process flow between students and corporate HR representatives.

Facilitate effective communication channels between students, faculty, and recruiting companies to optimize the recruitment process.

Organize pre-placement workshops and training sessions to enhance student preparedness for technical interviews and assessments.

TECHNICAL SKILLS

Programming Languages	Frameworks & Libraries	Tools & Technologies
JavaScript	ReactJS	Git & GitHub
HTML5	Node.js	MongoDB
CSS3	Express.js	RESTful APIs
		Testing & QA

PROJECTS

Property Pulse - Real Estate Management Application

Developed a comprehensive real estate management desktop application featuring offline functionality and efficient local data storage capabilities.

Implemented multi-language support (English and Hindi) to enhance user accessibility and integrated Excel export functionality for seamless data management.

Utilized Electron.js, HTML, CSS, JavaScript, and IndexedDB for local storage to create a robust offline-capable system.

Technologies: Electron.js, HTML5, CSS3, JavaScript, IndexedDB

Last Kart - Food Waste Reduction Platform

Engineered a full-stack web application addressing food waste by creating a platform where shopkeepers can list and sell near-expiry products at discounted prices.

Integrated real-time inventory management system with secure payment processing and comprehensive order tracking functionality.

Designed and implemented responsive user interfaces for both consumers and merchants to provide a seamless experience across devices.

Technologies: MongoDB, Express.js, React Native, Node.js (MERN Stack)

CERTIFICATIONS & ACHIEVEMENTS

AICTE Placement Preparation Course

Completed comprehensive training in resume building, interview techniques, aptitude preparation, and professional communication skills.

Developed workplace readiness competencies including technical problem-solving, team collaboration, and professional etiquette.

1st Place – Poster Presentation | International Conference on Next-Gen AI & Sustainable Innovation

Secured first place for pioneering research on applying artificial intelligence to address sustainability challenges.

Received recognition for innovation, technical precision, and cross-domain applicability in deploying intelligent systems for environmental and socio-economic impact.
